# NOTABLES POINTS OF A TRIANGLE:
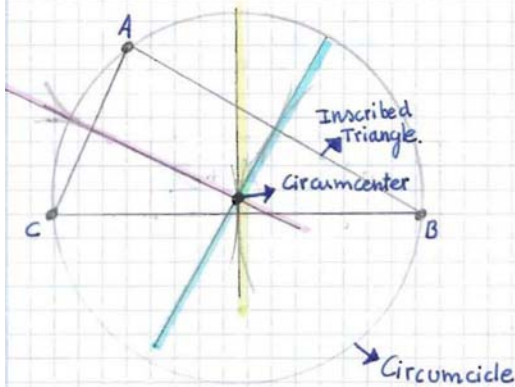

• Medium of a triangle:

The medium of a triangle is the line that join the middle point of a triangle side with the opposite vertex.

- Medium $\overline{BC}$
- Medium $\overline{AC}$
- Medium $\overline{AB}$

• Bisector of a triangle

The bisector of a triangle is the line that divide one side in two equal parts and it's perpendicular to this.

- Bisector $\overline{AC}$
- Bisector $\overline{AB}$
- Bisector $\overline{CB}$

• Bisectriz of a triangle:

Bisectriz: It's the line that divides to an angle in two equal angles

- Bisectriz $\hat{C}$
- Bisectriz $\hat{A}$
- Bisectriz $\hat{B}$

• Height of a triangle:

Height: The perpendicular straight line that goes through the opposite vertex.

- Height $\overline{AB}$
- Height $\overline{AC}$
- Height $\overline{BC}$
